# PRIME MINISTER'S OFFICE PARLIAMENT, POLICY AND COORDINATION NATIONAL EVALUATION PLAN – 2025/2026

October, 2025

### **Table of Content**

LIST OF ABBREVIATIONS	5
DEFINITION OF TERMS	6
EXECUTIVE SUMMARY	8
CHAPTER ONE	10
1. INTRODUCTION	10
1.1 Background	10
1.2.1 Inconsistency in methodology	11
1.2.2 Limited dissemination and use of findings	11
1.2.3 Capacity and resource gaps	11
1.2.4 Lack of a National Commitment	12
1.3 Rationale for the National Evaluation Plan	12
1.3.1 Enhancing Public Sector Performance	12
1.3.2 Strengthening accountability and transparency	
1.3.3 Improving service delivery	12
1.3.4 Institutionalizing a culture of evaluation	13
1.4 Objectives of the National Evaluation Plan 2025/26	13
1.4.1 General objective	13
1.4.2 Specific objectives	13
1.5 Scope of evaluation	14
1.6 Structure of the NEP	14
CHAPTER TWO	15
2.0 LEGAL AND POLICY FRAMEWORK	15
2.1 Foundational Guidelines for Monitoring and Evaluation	15
2.1.1 Integrated Monitoring and Evaluation Guideline of 2024	15
2.1.2 National Evaluation Management Guideline of 2024	15
2.1.3 National Evaluation Manual of 2024	16
2.1.4 M&E Readiness Assessment Guideline of 2024	16
2.1.5 Projects Monitoring and Evaluation Guideline of 2021	16
2.2 Policy and Legislative Instruments	17
2.2.1 Planning Commission Act of 2023	17
2.2.2 Public Finance Act of 2020	17
2.2.3 The Statistical Act of 2017	17
2.2.4 Public Service Management and Employment Policy of 2008	18
2.3 Alignment with Global Standards and Stakeholder Engagement	18
2.3.1 Alignment with International Best Practices	18
2.3.2 The Role of Parliament and Civil Society	19

CHAPTER THREE	20
3.0 EVALUATION IMPLEMENTATION PROGRESS 2024/25 AND PLAN	
FOR 2025/26	20
3.1 Types and Category of evaluation	20
3.1.1Types of Evaluation	
3.1.2 Categories of Evaluation	
3.1.3 Evaluation Selection Criteria	
3.1.4 Evaluations Selection Process	
3.2 Evaluation Implementation Status in 2024/25	22
3.3 Evaluation Plan for 2025/26	
CHAPTER FOUR	
4.0 IMPLEMENTATION ARRANGEMENTS AND COORDINATION	
4.1 Roles and Responsibilities of Key Stakeholders	62
4.2 Processes and Procedures for Evaluation Implementation	
4.2.1 The Evaluation Process	
4.3 Monitoring and Evaluation of the NEP	
4.4 Budgeting for Evaluations	67

#### **DEFINITION OF TERMS**

**Activity:** Action taken, or work performed through which inputs such as funds, human resources and other material resources are mobilized to produce specific outputs. Activities are what institutions do and describe processes which are largely internal to the institution.

**Evaluation:** Is a periodic, systematic, rigorous, and meticulous application of scientific methods to assess the design, implementation, improvement, or outcomes of a program.

**Indicator:** A quantitative or qualitative factor or variable that provides a simple and reliable means to measure achievement, reflect changes connected to an intervention, or assesses performance of an institution.

**Monitoring:** Is an on-going function that uses systematic collection of data on specified indicators which aims at providing management and the main stakeholders of an ongoing intervention on an indication of the extent of progress and achievement of objectives and progress in the use of allocated funds.

Learning: It basically connotes change of behavior because of experience and training.

**Outcome:** Changes that arise from the intervention outputs of a project, program, or policy. An outcome entails behavioral or organizational change and or benefits accruing to customers and other stakeholders.

**Output:** Are products, goods and services which result from an intervention which are relevant to the achievement of outcomes.

**Process:** Is a series of actions or steps which are carried out in order to achieve a particular result.

**Programme:** A time-bound intervention that differs from a project in that it usually cuts across sectors, themes, or geographic areas, uses a multidisciplinary approach, involves more institutions than a project, and may be supported by different funding sources.

**Project:** A lowest level in the planning series undertaking designed to achieve certain specific objectives within a given budget and within a specified period of time.

**Results**: A broad term used to refer to the effects of a program or project. The terms output, outcome or impact (intended or unintended, positive and/or negative) describes more precisely the different types of results.

**M&E System:** Consists of related, interdependent, and interacting components i.e. performance indicators, performance reports, performance reviews, evaluations and data systems.

**Information:** Is data that has been processed for a specific purpose and verified to be accurate and timely. It is presented within a context that gives it meaning, relevance, and leads to an increase in understanding and decrease in uncertainty.

**Input:** This is a resource required to accomplish an activity e.g. time, finance, human, and material resources.

**Intervention:** Is the act or an instance of intervening, this could be through a policy, programme, strategy, plan, and project

#### **EXECUTIVE SUMMARY**

The National Evaluation Plan (NEP) 2025/26 represents Tanzania's commitment to building a transparent, evidence-informed public sector capable of delivering better services and achieving national development priorities. Coordinated by the Prime Minister's Office – Policy, Parliament and Coordination (PMO-PPC), the NEP seeks to institutionalize a culture of evaluation, elevate the quality of government decision-making, and enhance the impact of public programs and policies through systematic, strategic assessments.

The need for a national evaluation arises from longstanding challenges in public sector. These include inconsistent evaluation methodologies, limited dissemination and use of findings, inadequate capacity across Ministries, Departments and Agencies (MDAs), and a lack of national coordination or political prioritization for evaluation. The NEP is a response to these gaps designed to provide a coherent system for conducting, managing, and utilizing evaluations to improve government performance, accountability, and service delivery.

Grounded in the updated legal and policy framework introduced in 2024 most notably the National Evaluation Manual and the Evaluation Management Guideline the NEP establishes a unified system for designing, executing, and managing evaluations across all sectors. It integrates global benchmarks like the OECD-DAC criteria and the Sustainable Development Goals (SDGs), while firmly rooting its priorities in Tanzania's own national agenda, including Vision 2025 and the Third Five-Year Development Plan (FYDP III).

In financial year 2024/25, only seven of the eighteen planned national evaluations reached completion, with the remainder stalled or uninitiated largely due to limited resources and institutional capacity. This shortfall underscores the need for a more structured and accountable evaluation system, which the 2025/26 NEP now enforces. The new plan focuses on evaluations that carry weight for national development, targeting key sectors like agriculture, health, education, infrastructure, environment, gender, and public finance. Each evaluation is selected through a transparent process

guided by specific criteria, such as strategic relevance and potential to generate actionable insights.

The NEP 2025/26 emphasizes a robust implementation mechanism, detailing the roles of key stakeholders including the PMO-PPC, MDAs, Regional Secretariats, Parliament, development partners, civil society, and research institutions. It also outlines the evaluation lifecycle from concept note to dissemination with strict requirements for quality assurance, resource mobilization, and management responses to evaluation findings. To sustain this agenda, each institution must allocate funds in their annual budgets, with the PMO-PPC advocating for supplementary support from the Ministry of Finance and donors.

Ultimately, NEP is more than a technical tool, it is a strategic governance instrument. It signifies a shift from ad-hoc, donor-driven evaluation efforts toward a nationally owned, methodologically sound, and results-driven evaluation system. Through this plan, Tanzania aims to strengthen public trust, reduce policy failures, and accelerate progress toward its long-term development goals by making evaluation a central, non-negotiable pillar of its governance architecture.

Dr. Jim James Yonazi

**Permanent Secretary** 

Prime Minister's Office - Policy, Parliament and Coordination

#### CHAPTER ONE

#### 1. INTRODUCTION

#### 1.1 Background

The Government of the United Republic of Tanzania, under the custodian of the Prime Minister's Office- Policy, Parliament and Coordination (PMO-PPC), is dedicated to fostering a culture of effective, transparent, and accountable governance. This commitment is deeply rooted in the nation's development agenda, which aims to improve the wellbeing of its citizens through strategic and impactful public interventions. A central pillar of this agenda is the principle of evidence-based policymaking, where government decisions and resource allocations are informed by credible data and rigorous analysis of past performance.

In line with this commitment, the PMO-PPC is responsible for strengthening the government's monitoring and evaluation (M&E) systems. The Office serves as the central coordinating institution, responsible for ensuring that M&E functions are harmonized across all Ministries, Departments, and Agencies (MDAs). This strategic oversight is essential to avoid duplication of efforts, standardize methodologies, and ensure that the findings from evaluations are used to improve the design and implementation of new government interventions including policies, programs, projects and plans.

By institutionalizing a national evaluation framework, the government seeks to move beyond traditional monitoring which focuses on tracking progress and outputs to comprehensive evaluation, which assesses relevance, efficiency, effectiveness, impact, and sustainability of interventions. This shift is crucial for understanding what works, what doesn't, and why, thereby maximizing the return on public investments and accelerating the achievement of national development goals.

#### 1.2 Situational Analysis of Evaluation in Tanzania

The landscape of evaluation in Tanzania has been improved over the past decade, but it also faces inherent challenges. The government and its development partners have increasingly recognized the value of evaluations as a tool for learning and accountability. Many sectors, particularly those with significant donor support such as education, health, water and agriculture, have undertaken project-specific evaluations, generating valuable insights. Third Five Year Development Plan (FYDP III) 2021/22–2025/26 has also provided a clear framework for measuring progress, with various MDAs conducting internal assessments to report on their contributions to national targets (example Government Performance Report 2023/24).

Despite the effort to document Government Performance Report annually, there has been a lack of a unified, government-wide agenda for conducting evaluations. This has resulted in several gaps:

#### 1.2.1 Inconsistency in methodology

Public sectors use varying standards and approaches in conducting evaluation. This makes it difficult to compare findings or synthesize a cohesive national picture of performance. Without a common framework, building a cumulative body of knowledge on what works and why is a challenge, compromising the credibility and utility of evaluation findings at a national level.

#### 1.2.2 Limited dissemination and use of findings

Even high-quality evaluation reports are often underutilized, with their findings frequently remaining within the confines of the commissioning ministry. They are not always systematically shared with relevant policy-makers or integrated into the broader planning and budgeting cycles. This creates a disconnect between evidence and policy, leading to a risk of repeating past mistakes and missed opportunities for learning and improvement.

#### 1.2.3 Capacity and resource gaps

While some Ministries, Departments, and Agencies (MDAs) have strong M&E units, many others lack the necessary technical expertise and dedicated resources to conduct robust evaluations. This creates an uneven playing field and limits the government's overall capacity to generate credible evidence independently, leading to an over-reliance on external consultants, which can hinder internal learning and knowledge retention.

#### 1.2.4 Lack of a National Commitment

The absence of evaluation plan has meant that evaluations are not always seen as a national priority, but rather as an optional exercise tied to specific projects or donor requirements.

The National Evaluation Plan (NEP) by considering both National Evaluation Manual 2024 and Guideline for Evaluation Management 2024 jointly is designed to directly address these challenges by providing a structured, coordinated, and transparent approach to national evaluations. It marks important step forward in building a mature and effective national evaluation system.

#### 1.3 Rationale for the National Evaluation Plan

The NEP is a strategic management tool that serves several purposes. It provides the rationale and structure for a more disciplined and purposeful use of public resources. The primary justifications for the 2025/26 NEP are as follows:

#### 1.3.1 Enhancing Public Sector Performance

By evaluating the performance of national-level interventions, NEP generates evidence on what works and what doesn't. This evidence is a powerful tool for policymakers, enabling them to make informed decisions to scale up successful programs, reform underperforming ones, or terminate those that are ineffective. This leads to more efficient and impactful use of public resources.

#### 1.3.2 Strengthening accountability and transparency

A publicly available NEP demonstrates the government's commitment to being accountable to its citizens and development partners. By outlining which evaluations will be conducted and when, it creates a transparent process that allows stakeholders to track the government's self-assessment efforts. This fosters trust and provides a basis for public dialogue on key development issues.

#### 1.3.3 Improving service delivery

The goal of government interventions is to improve the lives of Tanzanian citizens. Evaluations are the right approach for assessing the impact of these interventions on service delivery such as education, health, water, agriculture, or infrastructure sectors. The findings from these evaluations will directly inform reforms aimed at making public services more accessible, efficient, and responsive to citizens' needs.

#### 1.3.4 Institutionalizing a culture of evaluation

The NEP institutionalizes a regular evaluation cycle, ensuring that evaluations become a standard and expected part of the policy and program lifecycle. This moves evaluation from a reactive exercise to a proactive, forward looking one. It encourages ministries to plan for evaluations from the outset, integrating them into their strategic and operational plans.

#### 1.4 Objectives of the National Evaluation Plan 2025/26

#### 1.4.1 General objective

The General objective of the NEP is to strengthen the national evaluation system and promote evidence-informed decision-making by providing a transparent, coordinated, and comprehensive plan for all major national evaluations.

#### 1.4.2 Specific objectives

Specifically, NEP intends to achieve the following:

- 1. To ensure that all planned evaluations are directly aligned with the goals and priorities of Tanzania's Development Vision, Five-Years Development Plan (FYDP) and the strategic plans of Government Ministries.
- 2. To facilitate the use of evaluation findings in policy formulation, program redesign, and resource allocation by clearly outlining the purpose and expected outputs of each evaluation.
- 3. To serve as a central coordinating mechanism for evaluation efforts across government institutions, standardizing methodologies and fostering collaboration to share best practices.
- 4. To make the government's evaluation agenda publicly available, thereby increasing transparency and accountability to citizens, Parliament, and development partners.

#### 1.5 Scope of evaluation

The scope of the 2025/26 National Evaluation Plan (NEP) is focused on a strategic set of evaluations that directly support national development priorities. This includes a diverse range of high-level interventions with sufficient budgetary allocations. The plan covers national-level policies, programs, projects, evaluations of government-wide reforms and thematic evaluations that cut across multiple sectors. By focusing on these critical areas, the NEP ensures that evaluation efforts are aligned with Tanzania's Five-Years Development Plan (FYDP) and contribute to achieving the most important development goals.

#### 1.6 Structure of the NEP

This National Evaluation Plan is organized into the following chapters:

- Chapter 1: Introduction provides the background, rationale, and objectives of the plan.
- Chapter 2: Legal and Policy Frameworks- This chapter provides the legal and policy frameworks governing the formulation of the Evaluation Plan.
- Chapter 3: Evaluation Implementation progress for 2024/25 and the plan for 2025/26- This chapter provides an overview of the evaluation implementation progress undertaken in the previous fiscal year 2024/25 and a detailed plan for the current financial year 2025/2026.
- Chapter 4: Implementation arrangements and coordination of the Plan.

  This chapter outlines the clear roles and responsibilities of key stakeholders and the processes that will guide the NEP's execution, ensuring accountability, quality, and coordinated action across the government, its partners and budgeting of the Evaluation Plan

#### **CHAPTER TWO**

#### 2.0 LEGAL AND POLICY FRAMEWORK

Tanzania's commitment to effective governance and evidence-based decision-making is underpinned by a robust legal and policy framework. This framework provides the mandate, structure, and guidelines for implementing and managing evaluation functions across the public sector. The following section outlines the key legislative and policy instruments that guide the National Evaluation Plan (NEP) and foster a conducive environment for a strong national evaluation system.

#### 2.1 Foundational Guidelines for Monitoring and Evaluation

#### 2.1.1 Integrated Monitoring and Evaluation Guideline of 2024

This comprehensive guideline serves as the foundational document for M&E within the government. It offers a detailed framework for designing, establishing, and strengthening M&E systems in public institutions. The guideline clarifies the roles and responsibilities of key stakeholders and provides practical instructions on a range of M&E activities. These include procedures and techniques for monitoring and evaluating policies, strategies, plans, programs, and projects. It also offers guidance on the preparation of performance indicators, data management and dissemination, and the crucial process of creating awareness on the use of M&E findings to inform decision making.

#### 2.1.2 National Evaluation Management Guideline of 2024

This guideline is specifically designed to streamline the process of conducting evaluations. It provides a clear roadmap for the entire evaluation lifecycle, from conceptualization and planning to implementation, data management, analysis, and the utilization of results. A key feature of this guideline is its focus on quality assurance; it outlines the criteria and procedures for identifying which evaluations should be conducted and specifies the institutional structures for managing evaluations at both the national and sectoral levels. This ensures a consistent, high-quality approach to all major evaluations.

#### 2.1.3 National Evaluation Manual of 2024

The National Evaluation Manual provides a standardized, step-by-step methodology for undertaking evaluations across various government levels. By adopting internationally recognized standards such as the Organisation for Economic Cooperation and Development – Development Assistance Committee (OECD-DAC) and African Evaluation Principles, this manual ensures that evaluations are rigorous, systematic, and consistent. It focuses on assessing key evaluation criteria, including coherence, relevance, appropriateness, efficiency, effectiveness, and sustainability, thereby generating credible evidence that is comparable across different interventions and sectors.

#### 2.1.4 M&E Readiness Assessment Guideline of 2024

To effectively build a results-based M&E system, it is essential to first understand the existing landscape. The M&E Readiness Assessment Guideline provides a diagnostic tool for comprehensively assessing the M&E capacities, processes, and systems within public institutions. It is designed to guide the identification of existing strengths, weaknesses, opportunities, and challenges. The insights gained from this assessment are crucial for making informed decisions about capacity-building initiatives and resource allocation necessary to design, build, and sustain a robust results-based M&E system.

#### 2.1.5 Projects Monitoring and Evaluation Guideline of 2021

This guideline is a key instrument for coordinating and guiding the M&E of projects and programs implemented across government institutions. Its primary purpose is to establish a basis for tracking the implementation progress of plans and projects, ensuring the availability of data, and facilitating regular reviews. It helps decision-makers and stakeholders stay informed about implementation to ensure accountability and transparency. It also provides a framework for identifying when goals and budgets may need to be reviewed and where further research is required, reinforcing the continuous learning cycle.

#### 2.2 Policy and Legislative Instruments

#### 2.2.1 Planning Commission Act of 2023

The Planning Commission Act of 2023 is a cornerstone of Tanzania's economic and social planning. It established the Planning Commission, an institution mandated to lead planning processes, supervise the implementation of economic and social plans, and conduct insightful policy analysis. The Commission's role is to provide creative and evidence-based solutions to problems of public importance, which are then implemented by the government. The existence of this body demonstrates the government's commitment to strategic planning and the use of evidence much of which will be generated by evaluations to guide national development.

#### 2.2.2 Public Finance Act of 2020

The Public Finance Act, 2020 provides the legal basis for the management of government finances, directly linking financial management to performance. Section 5 (1) (a) (i) mandates the Minister and National Treasury to supervise and monitor the nation's finances, while subsection (b) requires them to advise on resource allocation to various programs. This legislation highlights the importance of allocating financial resources to evaluations to ensure that programs are achieving their intended outcomes. Furthermore, Section 5 (2) (b) stipulates that the Minister must ensure systems are in place for planning, allocating, and budgeting for resource use, a function that is directly supported by the evidence and insights generated through the NEP.

#### 2.2.3 The Statistical Act of 2017

The Statistical Act of 2017 provides the legal framework for the collection, production, and dissemination of official statistics in Tanzania. Section 3 mandates the Bureau of Statistics to establish Sector Working Groups comprising members from line ministries and the Bureau itself. These groups are responsible for producing sector-specific statistics. The availability of high-quality, reliable statistics from these groups is fundamental for evaluation. These statistics provide the necessary baselines for interventions, enabling the measurement of progress and impact at different

stages of the program lifecycle. The Act, therefore, ensures that a crucial component of a robust evaluation system and credible data is available.

#### 2.2.4 Public Service Management and Employment Policy of 2008

The Public Service Management and Employment Policy (PSMEP of 2008, provides the overarching policy foundation for strengthening M&E functions within the public service. The policy explicitly stipulates the need for public institutions to have robust M&E systems to proactively solve management problems and respond to stakeholder's demands. As a direct result of this policy, the Government has undertaken reforms aimed at strengthening the M&E function across all government entities, from ministries and independent departments to regional secretariats and local government authorities. This policy provides the high-level mandate for the institutional reforms that enable the NEP to be implemented successfully.

#### 2.3 Alignment with Global Standards and Stakeholder Engagement

#### 2.3.1 Alignment with International Best Practices

Tanzania's legal and policy framework for M&E is not developed in isolation, it is deliberately aligned with global and regional best practices to ensure its credibility and effectiveness. This alignment enables the country to effectively monitor and report on its progress towards international commitments and fosters a culture of robust evaluation that meets global standards. A prime example is the framework's support for the Sustainable Development Goals (SDGs). By institutionalizing a systematic approach to evaluating national programs, the framework ensures that data on key development indicators such as poverty reduction, health, and education are consistently collected and analyzed. This allows the government to track its contributions to the SDGs and report on them accurately (e.g Tanzania's 2023 Voluntary National Review Report on the Implementation of the 2030 Agenda for Sustainable Development).

The principles embedded in Tanzania's national guidelines, such as relevance, effectiveness, and sustainability, directly mirror the criteria used by international development partners and evaluation bodies. This adherence to global standards also

strengthens partnerships with international organizations and donors, enhancing Tanzania's reputation as a government committed to accountability and the efficient use of resources.

#### 2.3.2 The Role of Parliament and Civil Society

While the government's M&E framework is led by the Prime Minister's Office, its success relies on the active participation of a wider ecosystem of stakeholders. The Parliament plays a crucial role in the accountability loop. Through its various standing committees, such as the Public Accounts Committee (PAC) and the Local Authorities Accounts Committee (LAAC), Parliament uses evaluation findings to perform its oversight function. The results from evaluations, including those outlined in the NEP, provide evidence for scrutinizing government performance, holding ministries accountable for their results, and making informed decisions on budget allocations for future financial years.

Civil society organizations (CSOs), academia, and think tanks also serve as vital partners in the national evaluation system. They often conduct independent evaluations, providing an alternative and often grassroots perspective on the effectiveness of government policies. This complementary approach enriches the national discourse on development and strengthens the overall accountability of the public sector. The government's framework encourages collaboration with these non-state actors, viewing them not as adversaries but as valuable contributors to a comprehensive, multi-stakeholder's evaluation ecosystem.

#### **CHAPTER THREE**

## 3.0 EVALUATION IMPLEMENTATION PROGRESS 2024/25 AND PLAN FOR 2025/26

This chapter presents the different types and categories of evaluations, as well as the selection criteria applied to identify interventions for inclusion in the National Evaluation Plan, based on the 2024 Evaluation Management Guidelines and the Evaluation Manual issued by the Prime Minister's Office. It also provides an overview of the evaluation implementation progress undertaken in the previous fiscal year 2024/25 and a detailed plan for the current financial year 2025/2026. It serves as a vital component of the National Evaluation Plan, demonstrating the government's commitment to continuous learning and accountability by documenting past performance and outlining future priorities. The chapter is structured into two main sections to provide a clear and comprehensive picture of Tanzania's evaluation landscape.

#### 3.1 Types and Category of evaluation

#### 3.1.1Types of Evaluation

Evaluations are generally categorized based on their timing and purpose in the program or policy cycle. Common types include formative, process, outcome, and impact evaluations. Formative evaluations are conducted during the planning or early stages of an intervention to improve design and implementation. Process evaluations assess how a program is being implemented, focusing on operations, resources, and adherence to planned activities. Outcome evaluations measure the immediate and intermediate effects of a program, while impact evaluations assess the broader, long-term changes directly attributable to the intervention, often using experimental or quasi-experimental designs. In line with evaluation categories, the types of evaluations are as indicated in the table 1 and 2 below.

#### 3.1.2 Categories of Evaluation

Evaluations can also be categorized based on their focus or scope. These categories may include strategic evaluations, which assess high-level policy or national development strategies; programmatic evaluations, which examine specific programs or sectoral interventions; and thematic evaluations, which explore crosscutting issues such as gender, climate change, or youth empowerment. Each category helps decision-makers understand not only what works, but also why and under what conditions—supporting evidence-based policy and budgeting decisions. These distinctions guide the selection and design of evaluations under frameworks like Tanzania's National Evaluation Plan.

#### 3.1.3 Evaluation Selection Criteria

The selection of evaluations for inclusion in the National Evaluation Plan (NEP) is guided by a set of clear criteria to ensure relevance, strategic alignment, and potential for impact. Key criteria include the **strategic importance** of the intervention in relation to national development priorities, **public interest and visibility**, the **scale of investment** involved, and the **likelihood that evaluation findings will be used** for policy improvement or decision-making. These criteria are outlined in the 2024 Evaluation Management Guideline and Evaluation Manual issued by the Prime Minister's Office, to ensure evaluation resources are directed toward interventions that are most critical to national development, accountability, and learning. Therefore, all Public Service Institutions are required to apply these criteria when planning their evaluations, ensuring that the final selection aligns with national priorities.

#### 3.1.4 Evaluations Selection Process

The process for selecting evaluations is a collaborative, multi-stage approach designed to ensure the NEP is both strategic and nationally endorsed. It begins with the Prime Minister's Office- Policy, Parliament and Coordination (PMO-PPC) issuing an official call for submissions to all Ministries and their respective Institutions. Each Ministry is required to apply the established evaluation selection

criteria to its interventions and submit a preliminary list by using standardized templates.

Following the submission period, the PMO-PPC through PMED undertakes a detailed review and consolidation of all proposals. This involves verifying that each evaluation meets the selection criteria, harmonizing submissions to avoid duplication, and synthesizing them into a single, comprehensive draft list. The final list, along with the complete NEP document, is then submitted to the Permanent Secretary for official approval. This formal endorsement by the Prime Minister's Office signifies the government's official commitment to carrying out the evaluations outlined in the plan.

#### 3.2 Evaluation Implementation Status in 2024/25

This section summarizes the status of all national-level evaluations initiated by Ministries, Departments, and Agencies (MDAs) during the 2024/25 financial year. The purpose is to provide a comprehensive record of the evaluation progress. Instead of merely listing activities, this section is designed to present a clear, consolidated picture of what was achieved and what remains in progress. As detailed in Table 1, out of 18 evaluations only 7 evaluations were fully completed, 5 are in progress and 6 are not implemented.

**Table 01: Evaluation Implementation Status in 2024/25**

#### 3.3 Evaluation Plan for 2025/26

This section details the strategic, national-level evaluations scheduled for the 2025/26 financial year. These interventions have been selected based on the evaluation criteria, ensuring they are directly aligned with the national Five-Years Development Plan (FYDP) and other national priorities. The evaluations are presented in a structured format to facilitate effective planning, budgeting, and coordination across all government institutions. Table 02 below lists the national-level evaluations done for the year, providing key details such as their purpose and expected outcomes to ensure a shared understanding with stakeholders, commitment and accountability.

Table 02: Evaluation Plan for 2025/26

## **CHAPTER FOUR**

## 4.0 IMPLEMENTATION ARRANGEMENTS AND COORDINATION

Effective implementation of the National Evaluation Plan (NEP) is crucial for generating credible evidence that can inform planning, budgeting, and policy decisions. This chapter outlines the clear roles and responsibilities of key stakeholders and the processes that will guide the NEP's execution, ensuring accountability, quality, and coordinated action across the government and its partners.

# 4.1 Roles and Responsibilities of Key Stakeholders

The successful implementation of the NEP hinges on the coordinated efforts of a wide range of actors. The PMO-PPC through the Performance, Monitoring and Evaluation Department (PMED), will lead this effort, collaborating with Ministries, Departments, and Agencies (MDAs), Regional Secretariats (RSs), and Local Government Authorities (LGAs). The table below outlines the specific roles each entity will play.

Table 03: Roles and Responsibilities of Key Stakeholders

Entity	Roles and	d Responsibilities		
Prime Minister's Office –	(i)	Lead the development of NEP in		
Policy, Parliament and	<b>(**</b> )	collaboration with all key stakeholders.		
Coordination (PMO-PPC)	(ii)	Oversee and coordinate the implementation of the NEP across all government levels.		
	(iii)	Provide quality assurance for all evaluation reports before their dissemination.		
	(iv)	Establish and manage a central repository for evaluation reports to ensure easy access and knowledge sharing.		
	(v)	Directly conduct or commission rigorous national-level evaluations as specified in the NEP.		

Entity	Roles and Responsibilities				
	(vi)	(vi) Secure resources from the Ministry of Finance to supplement sectoral evaluation budgets.			
MDAs, RSs & LGAs	(i)	Approve and integrate the NEP into			
		their respective sectoral and strategic			
		plans.			
	(ii)	Identify and submit priority evaluations			
		for inclusion in the NEP.			
	(iii)	Mobilize and allocate resources,			
		including budgetary provisions, for			
		their planned evaluations.			
	(iv)	Implement their sectoral evaluations in			
		line with the NEP and established			
		guidelines.			
	(v)	Submit completed evaluation reports			
		the PMO-PPC and relevant			
		Parliamentary Portfolio Committees.			
	(vi) (vi) Implement the recommendation				
		from completed evaluations to improve			
		service delivery and policy			
		effectiveness.			
	(vii)	Facilitate capacity-building initiatives			
		to strengthen staff evaluation skills.			
	(viii)	Provide coordination and technical			
		support for evaluation activities within			
		their jurisdiction.

Parliament	(i)	Utilize evaluation findings to inform		
		legislative decisions, policy		
		formulation, and budget allocation.		
	(ii)	Exercise oversight by holding the		
		government accountable for the		
		effective implementation of the NEP.		
	(iii)	Ensure that evaluation findings are		
		communicated to the public, fostering		
		transparency and participatory		
		governance.		
	(iv)	Demand periodic reports from MDAs		
		on the outcomes and impact of		
		evaluations.		
<b>Development Partners</b>	(i)	Conduct and commission evaluations		
		aligned with their supported sectors and		
		report on findings of national interest.		
	(ii)	Provide financial support and technical		
		expertise to assist with NEP		
		implementation and capacity-building.		
	(iii)	Advocate for evidence-based decision-		
		making through policy dialogue and		
		advisory services.		
	(iv)	Promote collaboration among		
		stakeholders and support the use of		
		innovative technologies in M&E		
		processes.		

Entity	Roles and	Responsibilities		
Civil Society	(i)	Utilize evaluation findings to inform		
Organizations (CSOs) &		public discourse and influence poli		
Voluntary Organisations		development.		
for Professional Evaluation	(ii)	Provide independent or joint		
(VOPEs)		evaluations to complement government		
		efforts and enrich the evidence base.		
	(iii)	Offer technical expertise, training, an		
		mentorship to government officials and		
		other stakeholders.		
	(iv)	Engage with communities to ensure		
		evaluations are inclusive, culturally		
		relevant, and consider diverse		
		perspectives.		
Academia & Research	(i)	Designing evaluation methodologies;		
Institutions	(ii)	Conducting rigorous assessments;		
	(iii)	Analysing data;		
	(iv)	Ensuring quality and credibility of		
		evaluation evidence;		
	(v)	Serving as evaluation partners.		
	(i)	In some cases, private entities may		
		contribute resources, data or innovation;		
Private Sector		possibly as contractors/partners in		
		evaluations; involvement in uptake of		
		findings.		
	(i) ]	Provide feedback, help in data collection;

# 4.2 Processes and Procedures for Evaluation Implementation

To ensure a systematic and credible approach to evaluations, all implementing institutions must follow the procedures outlined in the National Evaluation Management Guideline, 2024. The PMO-PPC will provide a clear implementation matrix to guide these activities.

#### **4.2.1 The Evaluation Process**

The following steps must be followed for every national evaluation identified in the NEP:

- Concept Note Development: The implementing institution develops a
  concept note detailing the purpose, scope, budget, and funding source for the
  evaluation.
- 2. **Technical Review:** An Evaluation Technical Working Group, established for this purpose, reviews and provides feedback on the concept note.
- 3. **PMED Approval:** The concept note is reviewed and approved by the PMO-PPC.
- 4. Terms of Reference (ToRs) and Procurement: The implementing institution develops detailed ToRs based on the approved concept note and follows government procurement guidelines to select an individual consultant or firm.
- 5. **Evaluation Execution and Quality Assurance:** The evaluation is undertaken, and the draft report undergoes a rigorous quality assurance review by the PMO-PPC and the Evaluation Technical Working Group to ensure its credibility and rigor.
- 6. **Management Response and Dissemination:** The implementing institution develops a management response to the evaluation's findings and recommendations. The final report is then submitted to Parliament and other relevant stakeholders for dissemination and use.

# 4.3 Monitoring and Evaluation of the NEP

The PMO-PPC will oversee the implementation of the NEP itself to ensure all planned evaluations are executed in a timely and effective manner.

- Annual Progress Reporting: The PMO-PPC will prepare an annual progress
  review, reporting on the status of all evaluations listed in the NEP, including
  those that have been completed, are ongoing, or have experienced changes in
  scope or timeline.
- Implementation Matrix: An implementation matrix will be used as the primary tool for tracking progress. This matrix will require all responsible MDAs to provide regular updates on their evaluations, including the current status, means of verification, and a justification for any delays or deviations from the plan. This ensures a transparent and accountable monitoring process.

# 4.4 Budgeting for Evaluations

The financing of evaluations within the NEP is a shared responsibility. The respective MDAs, RSs, and LGAs are required to budget for the evaluations they intend to undertake in their annual planning cycles. The PMO-PPC will play a key role in advocating for and securing additional resources from the Ministry of Finance and other stakeholders to supplement these budgets, ensuring that a lack of funding does not impede the implementation of critical evaluations. This dual approach to budgeting ensures both a decentralized commitment and centralized support for the national evaluation agenda.

## **Annexure I: National Evaluation Plan Implementation Matrix**

This matrix serves as a template for tracking the progress and status of all evaluations listed in the National Evaluation Plan. It facilitates transparent, systematic reporting to ensure accountability and effective management of the evaluation process.
